

## **Bell Kit Cleaning and Maintenance Instructions**

1. Wipe your bell kit and drum pad with a clean, dry, soft cloth to get rid of any dust/dirt.
2. If you are concerned about germs, you can spray a soft cloth with rubbing alcohol and wipe down your bell kit keys, drum pad, drum sticks, and mallets.
3. Clean out your bell kit case – recycle any trash or unnecessary papers.
4. If your mallet heads (the balls) are loose, use Superglue or Gorilla Glue to fasten them back on.
5. If you are missing your sticks, mallets, or Standard of Excellence Book, you can replace them at your local music store. You can also order them on Amazon (see the following link):
